Residential HVAC Right-Sizing Testing and Balancing

HVAC Rebate Program for Residential Customers

A Testing and Balance form is required per installed HVAC system. This form must be signed by a certified third-party HERS rater. This form can be replaced with the third-party HERS rater form, if it contains the same information as this form. For this program each room's air discharge may not vary more than 10% from Manual D design parameters with total system air discharge not varying more than 5%. **Testing and Balancing must be based on cooling flow only.** Assume a max duct leakage of no more than 15% - if actual is higher, you must provide justification.
