Mail rebate check to: \_\_\_\_\_

## Commercial Irrigation Efficiency Rebate Program

### Terms and Conditions

1. The commercial irrigation efficiency rebate program runs from July 1, 2015 to June 30, 2016.
2. Participants must be a City of Roseville water customer and the property owner of record. Roseville residency is not required. If the property is managed by a property management firm, the property owner will need to provide written authorization allowing the property management firm to apply and satisfy the terms of the rebate.
3. Program applies to potable water customers only.
4. Private Homeowner's Associations, Lighting and Landscape Districts, and Community Facility Districts may not apply for more than ½ of the available program funding each program year.
5. Participants are eligible for one rebate per metered address per program year.
6. Rebate program is subject to available funding. Rebates will be distributed on a first-come, first-served basis until funding is depleted. Submission of an application does not guarantee a rebate.
7. The maximum rebate amount is \$2,500 per metered address. Rebate shall be given for water efficient irrigation products only. Items such as couplings, wiring, electrical tape, etc. are excluded from rebate funding.
8. Customer must have a maintained landscaped area with an existing automated irrigation system and irrigation controller.
9. Participants must agree to install, maintain and manage the new irrigation equipment for a minimum of 5 years and must remain in compliance with all program terms and conditions during that time.
10. Improved site must show a minimum 20% water savings to qualify for future rebate funding. Savings will be calculated comparing current usage against a two-year average prior to improvement. If, after one year of implementation, the minimum is not saved the City may take any necessary steps to obtain reimbursement of the rebate amount.
11. City reserves the right to modify or cancel the program at any time.
12. The applicant's social security or tax ID number must be provided in order to receive a rebate. The request is in compliance with exemptions to the Federal Privacy Act of 1974, 42 U.S.C. Section 405(c) (2)(C). The IRS requires rebate program participants receiving \$600 or more in rebates to be issued an IRS Form 1099 unless exemptions apply.
13. I irrevocably authorize the City of Roseville, or anyone authorized/designated by the City, to use or reproduce any and all photographs which have been taken of my landscape as part of the cash for grass program by the City or the City's authorized agent(s) for any purpose determined by the City without compensation or further notice to me.

### How the program works

1. Participant submits a completed application, owner's authorization form (if applicable) and an irrigation improvement plan.
2. Participant must schedule a pre-conversion survey with a City representative to review the irrigation improvement plan before any work is performed.
3. Participant may begin work only after receiving a notice to proceed by a City representative.
4. Participant has 90 days from the date of the pre-conversion site survey to complete the conversion according to the terms and conditions. Any deviations from the approved plan must be submitted in writing for approval by City staff. Improvements not previously authorized may not be eligible for a rebate.
5. When complete, customer must schedule a post-conversion site survey. During the survey, City staff will test the new irrigation equipment for proper installation and operation.
6. At the post-conversion site survey, customer will turn in all pre-existing irrigation equipment that was replaced as part of the program. Participant will also provide a final invoice on company letter head detailing the eligible irrigation equipment and their associated costs.
7. The program covers 75% of eligible irrigation parts. Labor is not eligible for reimbursement.
8. Rebate will not be issued until the project is completed in its entirety and according to the program's terms and conditions.

### Eligible Equipment

Eligible irrigation equipment includes improvements that improve irrigation efficiencies as determined by the City of Roseville representative. Efficiencies may include, but is not limited to:

- Low precipitation, high distribution uniformity sprinkler nozzles (i.e., MP Rotator, Toro Precision)
- Pressure regulating pop-up sprinkler bodies with check valves
- Pressure regulating equipment
- Moisture sensors and rain shut-off devices
- Converting pop-up sprinkler zones to low volume drip irrigation

I have read, understand and agree to the programs terms and conditions. \_\_\_\_\_
