

## Fats, Oil and Grease (FOG) Jar Decoration

**Subject: Wastewater, Be Sewer Smart**

Fats, oils and grease (FOG) cause large blockages if you send them down the drain. Make a FOG jar to collect that FOG and save your pipes.

### Materials List

1. Non-glass, sealable container like a coffee can or plastic peanut butter jar
2. Stickers, markers, other decorations

**Ages:** 5 - 12

**Time:** 10 - 20 minutes

### Instructions

1. Find and rinse a non-glass, sealable container.
2. Decorate! Have fun tricking it out with stickers, markers or other decorations.
3. Put your FOG jar to use. Scrape fats, oils and grease into your jar and store in the freezer until it is full.
4. Contact Roseville Utilities for FOG pickup, (916) 774-5780. (As of March 2020, pick-up service is temporarily suspended, but you can call to find out when it will be reinstated.)

### Table Talk

1. Can you give an example of FOG in your dinner?
2. What should you scrape into a jar instead of down the drain?
