

SANDBAGS

The City does not provide sandbags just because it is raining or because heavy rains are predicted within the coming days. The City only provides sandbags when creeks in Roseville are expected to reach levels that could flood homes. Otherwise, property owners wishing to obtain sandbags are referred to their local home improvement center where they can purchase sandbags and sand any time of the year. If your property is prone to flooding, it is highly recommended that you store sandbags on your property so that they are readily and quickly available at any time.

When creeks are expected to reach levels that could flood homes, the City will provide sandbags and sand free of charge at these locations:

- Maidu Regional Park at 1550 Maidu Drive (off of Rocky Ridge Drive)
- The City's Corporation Yard at 2005 Hilltop Circle (off of PFE Road)
- Washington Blvd. Recycle Yard (between Junction and All American City Blvd.) The Washington Blvd. location is only used as a backup if needed.

City crews will be at the sandbag stations to help residents fill sandbags. Sandbags will only be provided to residents who show proof of residency in Roseville (driver's license, etc.) Each vehicle will be limited to 20 sandbags per trip. This limit is to allow all residents at the sandbag station an equal and fair opportunity to obtain sandbags. If no other residents are waiting, more than 20 sandbags will be allowed. An information sheet will be provided to each vehicle at the sandbag station. This information sheet will provide instructions for placing the sandbags properly.

To find out if the City's sandbag stations are open, please call the City's Street Maintenance Division at (916) 774-5790.
