

Qualifying Shade Trees

These trees have been selected as trees that thrive in Roseville and have few pest and disease problems and deep root systems. To qualify for a rebate, please select a tree from the list below.

Keep these factors in mind when choosing your trees:

- Mature size of tree - see the tree tables below for planting distance recommendations
- Water requirements - match the tree to how much you water for fast growth and good health. Most landscapes are medium to high water but some trees are also appropriate for low water "xeriscape" plantings.
- Choose a diversity of plants (trees and other plants) to help reduce pests and disease problems.
- Photos and more information is available at: www.roseville.ca.us/ShadeTree

Large Trees (50 feet and taller)

Small trees (18-25' tall)

Medium trees (30-50' tall)
