Working Together to Create Amazing Results

The Library at Mahany | The Roseville Sports Center | The Utility Exploration Center | The Mahany Park

Investing in our community

Assuring sustainability by investing in public infrastructure and in our residents demonstrates the City of Roseville's commitment to the community and the environment. Collaboration between city departments provides the invaluable expertise required to build and maintain new and innovative services. Environmentally conscious development ensures a vibrant community and enhanced quality of life for our residents, business, customers and partners.

The uniquely innovative Utility Exploration Center is an epitome of Roseville's vision and goals.

The Mahany Complex

The City of Roseville takes a visionary approach to community service by providing personal enhancement, development and edification to all aspects of our resident's lives.

Mind – The Library at Mahany provides the tools and resources to allow our residents to expand their understanding of any topic bringing a world of information to their neighborhood.

Body – The Roseville Sports Center provides an accessible and affordable solution to community health and fitness by providing classes and equipment to enhance physical performance and improve personal health.

Spirit – The Utility Exploration Center offers stewardship and educational awareness of the latest in sustainable practices to help the community develop personal actions that sustain our natural resources and protect our world for future generations.

Community – The Mahany Park allows the community to celebrate the outdoors, enjoy sporting events and build valuable memories and traditions.

- 11. Photovoltaic Demonstration promoting locally provided renewable energy

Coming Full Circle

Development of the environmentally conscious Library, Utility Exploration Center and Media broadcast studios provides a rich and unparalleled value to the campus at Mahany. By adding the opportunity to expand personal growth intellectually,

environmentally and technologically, the City of Roseville demonstrates vested interest in every aspect of our resident's lives.

Roseville believes that civic sustainability goes beyond steel and concrete, for us, it has become a principle to live by.

The Roseville Utility Exploration Center has a unique mission to educate the Roseville school children, our community and the region about the benefits and feasibility of utilizing renewable and recycled resources, advanced technologies, and sustainable building and landscaping designs to inspire and motivate the practice of resource efficiency in everyday life.

Through our combined efforts we redefine the City's commitment to the community and produce amazing results.
