

POLICY FOR ALLOWING ENCROACHMENT OF DUMPSTERS (TRASH BINS) ON ROSEVILLE CITY STREETS

Dumpsters measuring more than six and a one-half feet (6.5 feet) in width will be permitted within City street right-of-way provided an encroachment permit is first obtained from the City of Roseville, Department of Public Works. The responsibility for obtaining an encroachment permit shall be the property owners, or his/her representative. The dumpster provider shall ensure the property owner is in receipt of the encroachment permit prior to delivery of the dumpster, otherwise the provider shall remove the dumpster within twenty-four (24) hours following notice. Failure of provider removal will result in City removal with all incurred expense responsibility to the provider.

Encroachment permits for dumpster placement will be approved provided the following conditions are met, and there is no feasible off-street application.

- 1. All dumpsters placed in City street right of way must be effectively reflectorized. "Effective reflectorization" means that all four sides of the dumpster shall be reflectorized. Each vertical edge of the dumpster shall have a full height reflective strip at least 4" wide to be visible from either direction. There shall also be a horizontal strip at least 4" wide across the full width of each side of the dumpster at its center. The reflectivity shall meet the requirements for barricades of the California State Manual of Traffic Controls.
- 2. Dumpsters placed where there are curbs and sidewalks must not protrude more than 8 feet into the street from the edge of the pavement with no encroachment into the sidewalk area. On street segments without curbs and sidewalks, dumpsters may not be placed where the vehicular travel width would be restricted. In no case will dumpster be allowed on a street where they would protrude out to the traveled way. In all cases, a minimum ten (10) foot clear motor vehicle lane shall be maintained within the projected, adjacent street lane lines.
- 3. Dumpsters may not be placed within 100' of the approach to a stop sign, traffic signal, traffic flasher, curve warning sign or pedestrian crosswalk.
- 4. Dumpsters will not be allowed on streets without sidewalks, unless adequate provision is made for pedestrians to go around the dumpster off the street.
- 5. Dumpsters may not be placed in a "no parking" or a "no stopping" zone.
- 6. No dumpsters shall be placed in any alley, restricting the flow of traffic, unless indicated on the special provisions on the Encroachment Permit and a twelve (12) foot lane shall be maintained for emergency vehicles.
- 7. Any dumpster placed on public right of way must have the name, telephone number and address of the owner of the dumpster prominently displayed on at least two sides.
- 8. Dumpsters may be placed on a public street for a maximum of 30 days.
- 9. Proof of Insurance must be provided to Risk Management before an encroachment permit will be issued.
- 10. Provider shall be responsible for any illicit/pollutant discharge from the trash bin into the storm drain system.
