## NOTICE OF AVAILABILITY OF A DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT

The City of Roseville, Environmental Utilities Department, has prepared a Draft Supplemental Environmental Impact Report (SEIR) for the City of Roseville Aquifer Storage and Recovery Program.

**Project Description/Location:** The Draft Supplemental EIR (SEIR) is a supplement to the Aquifer Storage and Recovery (ASR) Program Draft and Final EIR (SCH No. 2009072018) certified by the City of Roseville March 29, 2012. The 2012 ASR EIR addressed the environmental impacts of constructing and operating 13 ASR wells. Eight of the 13 wells have been constructed. Of the remaining five wells covered in the 2012 ASR EIR, two are still to be constructed, and are addressed in the Draft SEIR, in addition to six well sites not previously evaluated in the 2012 ASR EIR. Two of the proposed eight sites are considered back-up sites, only to be considered if other proposed sites are found to be infeasible.

ASR wells would be designed and constructed with capabilities to both inject and extract water. Well sites would average between 0.5 and 1 acres. Well casings would extend to a depth of approximately 500 feet. Underground components would include a well casing, filter pack, cement, downhole control valve, pump and column pipe. Above ground infrastructure would include pumps, electrical, and disinfection equipment. ASR well sites typically include a small building structure to enclose and secure all the well infrastructure. Above ground buildings are approximately 30 feet wide by 40 feet long by 16 feet high.

ASR well sites are proposed at the following approximate locations (closest major roadway intersection): Pleasant Grove Boulevard and Sun City Boulevard (Mahany Park), Pleasant Grove Boulevard and LaPorte Drive, Roseville Parkway and Foothills Boulevard, Marlin Drive and Cirby Way, Maidu Drive and Rocky Ridge Drive (Maidu Park), Industrial Avenue and Galilee Road, Roseville Parkway and Trestle Road (Vencil Brown Park), Fairway Drive and Central Park Drive.

Anticipated potentially significant environmental effects include short-term construction noise.

**Document Review and Availability:** In accordance with CEQA Guidelines Section 15105, the Aquifer Storage and Recovery Project Draft SEIR is available for a 45 day public review and comment period starting **August 7 and ending September 22 2020, at 5:00 pm.**

The SEIR can be viewed and/or downloaded from the City of Roseville website at [www.roseville.ca.us/groundwater](http://www.roseville.ca.us/groundwater). Copies of the SEIR are available for public review, by appointment, at the City of Roseville Permit Center, 311 Vernon Street, Roseville, CA 95678. To schedule an appointment online: [www.roseville.ca.us/DS-appointment](http://www.roseville.ca.us/DS-appointment) or call (916) 774-5285.

Written comments on the adequacy of the SEIR must be received no later than 5:00 pm on September 22, 2020. Written comments should be submitted to: Terri Shirhall, Environmental Coordinator, Roseville Development Services Department, 311 Vernon Street, Roseville, CA 95678; or, via email to: [tshirhall@roseville.ca.us](mailto:tshirhall@roseville.ca.us).

### Public Meetings:

A public workshop will be held on August 25, 2020. The time and venue of the meeting are still to be determined, but will be made available at [www.roseville.ca.us/groundwater](http://www.roseville.ca.us/groundwater).

The City of Roseville City Council will hold a public hearing on the project, but the date, time, and place of the public hearing are presently unknown. The City will publish a second notice providing the date, time, and place of the public hearing for the proposed project.
