

SENIOR UTILITY BILLING ANALYST

DEFINITION

To plan, organize, review and supervise the work of assigned personnel performing complex analytical and technical duties in support of utility financial systems including the application of business and technology solutions to improve and enhance business systems and applications; and to perform a variety of technical tasks relative to assigned area of responsibility.

DISTINGUISHING CHARACTERISTICS

This is the advanced journey level class in the Finance Utility Billing Analyst series. Positions at this level are distinguished from other classes within the series by the greater level of responsibility assumed, complexity of duties assigned, independence of action taken and by the nature, scope and impact of the public contact made. Employees perform the most difficult and responsible types of duties assigned to classes within this series, including providing direct supervision over assigned personnel and perform complex professional analytical work in support of internal and external customers.

SUPERVISION RECEIVED AND EXERCISED

Receives direction from assigned management or supervisory personnel.

Exercises direct supervision over lower level professional, technical and administrative support personnel.

EXAMPLES OF ESSENTIAL DUTIES - Duties may include, but are not limited to, the following:

Plan, prioritize, and review the work of professional, technical and administrative staff assigned to provide utility financial system support.

Develop schedules and methods to accomplish assignments ensuring work is completed in a timely and efficient manner.

Provide direct supervision over professional, technical and administrative staff including assigning, directing, training and evaluating subordinate staff; perform evaluations and recommend discipline.

Maintain and modify complex system table configurations to support on-going business needs; design and develop customer reports to support and enhance business needs and the use of enterprise applications.

Supervise and participate in projects to examine, define and modify business processes; serve as technical resource for the planning and execution of projects; plan and participate in the testing of new and/or modified systems.

Troubleshoot and resolve complex application software problems and issues for business unit applications; collaborate with Information Technology staff on system issues.

Perform complex financial analyses of utility information; assist with general accounting duties including balancing financial transactions, assisting with budget preparation, and performing data collection for the production of financial reports.

Design, develop and prepare financial and statistical reports as required by City Council, management and outside agencies.

Perform financial analysis and provide technical support in the building, development, testing and application of utility rates.

Provide technical support and training to users; document business application solutions to meet business requirements.

Answer questions and provide information to the public, via telephone, e-mail, and written correspondence; investigate complaints and recommend corrective action as necessary to resolve complaint.

Build and maintain positive working relationships with co-workers, other City employees and the public using principles of good customer service.

Perform related duties as assigned.
