# Let's get crafty!

Make an upcycled greeting card to help reduce waste.

## STEP 1

Fold a piece of paper in quarters so the front, back and inside of your card are blank.

## STEP 2

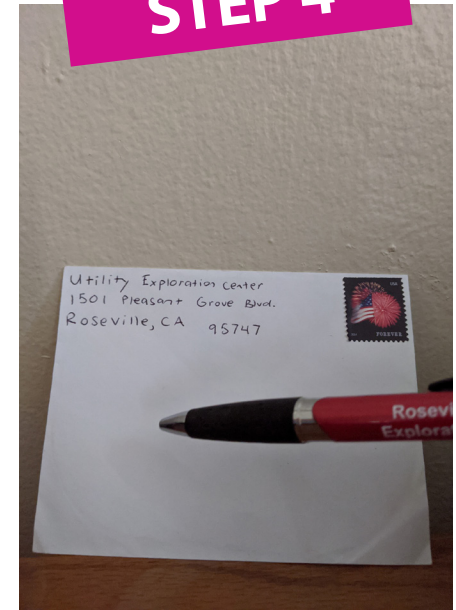

Look around your house for unwanted magazines, calendars or other used paper items and cut out some pretty pictures.

## STEP 3

Glue or tape the pictures to your paper, write a nice message and decorate your card.

## STEP 4

Give or mail your card to someone special to let them know you're thinking of them!
