# Environmental word search

Find the **BOLD** words in this word search.

It just rained, we watered the **flowers** and washed the car -- but where is that water going? Down the **storm drain** and directly to our **local** watershed. **Water** that flows out of our yards, sidewalks, and driveways to the storm drain doesn't get cleaned before it flows to our creeks, **lakes**, and **rivers**. We want healthy water for people, plants, and **animals** -- not soap from washing cars, fertilizer from lawns, or **bug** sprays. Remember, only **RAIN** in the drain -- and NO **Pollutants**!
