Appendix H Native American Consultation

Dave Singleton September 29, 2006 Program Analyst

Native American Heritage Commission 915 Capitol Mall, Room 364 Sacramento, CA 95814

Dear Mr. Singleton,

The City of Roseville has retained URS to complete a Subsequent Environmental Impact Report (EIR) for their Transportation System Capital Improvement Program (CIP). The CIP identifies the various improvements needed to serve the future transportation demands on the roadway system through the year 2020. The CIP is periodically updated to respond to changing conditions and to assure the development of an adequate transportation system, consistent with the City's Level of Service (LOS) policy. The current undertaking is comprised of various intersection upgrades and roadside improvements.

The intersections are depicted on the Citrus Heights, Folsom, and Roseville, California United States Geological Survey (USGS) topographic quadrangles. Specifically, these project components are located within:

Sections 1, 11, and 14 of Township 10 North, Range 6 East, and Sections 7 and 18 of Township 10 North, Range 7 East on the Citrus Heights Quadrangle;

Sections 5, 6, 7, 8, and 9, of Township 10 North, Range 7 East on the Folsom Quadrangle; and

Sections 6, 26, and 34 of Township 11 North, Range 6 East, and Section 31 of Township 12 North, Range 6 East on the Roseville Quadrangle.

As part of the impact analysis, I am requesting any information the Commission may have regarding properties, features, or materials within the project area that may be of concern to local Native Americans. Attached to this request are copies of the three USGS 7.5' topographic quadrangles delineating the intersections to be addressed in the EIR. Any comments you may have regarding this area would be greatly appreciated. In addition, I am requesting the Commission to provide a list of local Native American groups and individuals who may have specific knowledge of the project vicinity.

If you have any questions, please feel free to call me directly at (415)-243-3826. Thank you for your cooperation.

Sincerely,

URS

Re: record search request

Dear Ms. Torpy,

The City of Roseville has retained URS to complete a Subsequent Environmental Impact Report (EIR) for their Transportation System Capital Improvement Program (CIP). The CIP identifies the various improvements needed to serve the future transportation demands on the roadway system through the year 2020. The CIP is periodically updated to respond to changing conditions and to assure the development of an adequate transportation system, consistent with the City's Level of Service (LOS) policy. The current undertaking is comprised of various intersection upgrades and roadside improvements.

Among the tasks to be completed by URS for the development of the EIR is the completion of a literature review and record search. As such, I am requesting the North Central Information Center (NCIC) to complete a record search for the City of Roseville's CIP. URS authorizes the NCIC to bill us for this record search at a rate of \$120.00 per hour plus necessary reproduction costs.

Attached to this request are copies of each of the three USGS 7.5' topographic quadrangles that identify the various intersections that comprise the project area. Specifically, the project locales are depicted on the Citrus Heights, Folsom, and Roseville, California quadrangles. I have also included a checklist identifying the sources to be reviewed by the NCIC.

If you have any questions, please feel free to call me at (415)-243-3826. Thank you for your cooperation.

Sincerely,

URS Corporation

Re: Proposed Transportation System Capital Improvement Program, Placer County

Dear Mr. Hale:

A record search of the sacred land file has failed to indicate the presence of Native American cultural resources in the immediate project area. The absence of specific site information in the sacred lands file does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in the project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe or group. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-4038.

Sincerely

Debbie Pilas-Treadway

Subject: City of Roseville, Subsequent Environmental Impact Report for Transportation System Capitol Improvements Program (CIP)

Dear Mr. Hale:

Thank you for requesting information regarding the above referenced project. The United Auburn Indian Community (UAIC) is comprised of Miwok and Maidu people whose traditional homelands include portions of Placer and Nevada counties, as well as some surrounding areas. We are concerned about development within our ancestral territory that has potential to impact sites and landscapes that may be of cultural or religious significance. We appreciate the opportunity to comment on the proposed project.

In order to ascertain whether or not the project could affect cultural resources that may be of importance to the UAIC, we would like to receive copies of any archaeological reports that have been, or will be, completed for the project. We also request copies of environmental documents for the proposed project so that we have an opportunity to comment on potential impacts and proposed mitigation measures related to cultural resources.

We appreciate being notified, and look forward to seeing the results of the cultural resource studies. Should you have any questions, please contact our environmental consultant, Shelley McGinnis, of Analytical Environmental Services at (916) 447-3479. Thank you.

Sincerely,

Greg Baker
